PORTEO –the door assistant that adds convenience to doors

The PORTEO offers an innovative and convenient way to open and close doors effortlessly. With all the elegance of the DORMA Contur design, the PORTEO is specifically suited to interior doors, performing all the functions needed to make life just that little bit easier for all. High-quality DORMA technology makes the PORTEO particularly easy to operate – with minimum noise, high functional reliability and excellent application adaptability. The PORTEO is an integrated solution that comes in a complete package with slide channel and mounting backplate. It offers outstanding convenience and safety plus fast and easy installation, thanks to its impeccable “plug&go” credentials.

The PORTEO can be further functionalised with original DORMA system accessories to give even more operating convenience, user-friendliness and enhanced safety. In combination with an optional pushbutton and an electric strike, for example, the door can be simply opened with fingertip control. Use the hand-held transmitter “DORMA atent” for even more convenient opening and closing – it doesn’t get more flexible than this.

The PORTEO is the inexpensive solution for opening and closing doors the convenient way. Safe, reliable and readily retrofittable.

Certified to ISO 9001

Benefits point for point

- Door assistant for swing doors
- Effortless opening and closing of swing doors up to a width of 1100 mm and a leaf weight of 80 kg.
- Compact dimensions 60 x 530 x 80 mm (H x W x D), particularly suitable for use in conjunction with narrow-stile and standard profile door systems.
- Extremely low overall height of just 60 mm.
- One model for all four fixing options: pull and push side, transom-fixed or leaf-fixed
- Easy installation thanks to “plug&go” supply, with standard mounting backplate
- Near-silent operation
- In DORMA Contur design, cubic lines, winner of the 2005 red dot award and “Le Janus de l’Industrie 2007”
- GGT-approved

red dot design award
winner 2005

Applications

Interior doors, single-leaf 	
Door leaf width	≤1100 mm
Door leaf weight, max.	100 kg

PORTEO technical data

Transom-fixed/Leaf-fixed	●
Push-side/Pull-side	●
Non-handed	●
Latching action with on/off switch	●
Dimensions H x W x D	60 x 530 x 80 mm
Weight	3,2 kg
Power supply data	230 V AC, 50/60 Hz
Power supply to external loads	24 V DC, 300 mA
Class of protection	IP 20
Low-energy mode	●
Compliant with DIN 18650	●
CE marking	●
GS mark, TÜV-approved	●

Adjustable parameters

Opening time (0°–90°) adjustable	5 to 10 sec.
Closing time (90°–0°) adjustable	5 to 10 sec.
Hold-open time adjustable	5 to 30 sek.*
Opening angle adjustable, max.	110°

* in operating mode PowerLess 0.5 to 30 sek.

Standard function modes

PowerLess	●
Push&Go	●
PowerMotion	●
PermanentOpen	●
Obstruction detection	●
Anti-tamper safety disconnection	●
Automatic recognition	
Door is locked	●
Door has an e-opener	●

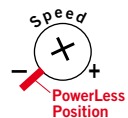

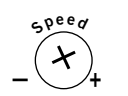

Prepared for following accessories

Electric strike, e.g. DORMA Basic model	○
Hand-held transmitter, e.g. DORMA RC-T HandHeld	○
Pushbutton, e.g. DORMA System 55 devices	○

● Standard ○ Option

Standard functions

Operating mode	Door equipment	Settings	
		Programme switch	Potentiometer
 PowerLess Effortless manual door opening. Door closes automatically following individually preset hold-open time.	– Standard lock – Lever handle	I	1 
 Push&Go Once door opened manually 3°, automatic door opening function initiated. PORTEO then closes the door again automatically after pre-set hold-open time.	– Standard lock – Lever handle	I	1  Opening and closing time adjustable. Factory setting 10 sec. (max.)
 PowerMotion Automatic opening and closing of door in combination with an electric strike and external activators such as manual push-button, radio remote control or transponder. As soon as signal transmitted and electric strike released, door automatically opens and then closes again after pre-set hold-open time.	– Standard lock – Electric strike – External activator	I	2  Hold-open time adjustable
 PermanentOpen This function enables the door to be held open for as long as required. Door closes again on receipt of new signal, activated either from the programme switch (door lock must be disengaged) or by pressing a pushbutton twice (current impulse relay function).		II	

Programme switch modes

Switch position 0 = OFF

Switch position I = PowerMotion

Switch position II = PermanentOpen

Main power switch must be “ON” to activate operating modes.

Max. permissible door widths and weights

Transom-fixed, pull side

(Example refers to left-hand (ISO 6) door; mirror image applies to right-hand (ISO 5) door)

Transom-fixed, push side

(Example refers to left-hand (ISO 6) door; mirror image applies to right-hand (ISO 5) door)

Plug&Go Power connector for mains outlet

(Example refers to left-hand (ISO 6) door; mirror image applies to right-hand (ISO 5) door)

Mounting backplate 30 mm or 40 mm

For fixing the slide channel to door frames for which direct installation is not possible.

Angle bracket

For fixing the slide channel to door frames with a deep top jamb, for push-side transom fixing.

For top jamb depths of -20 to +200 mm with optional projecting arm assembly

Glass saddle plate

For fixing the slide channel to all-glass doors – no glass machining necessary.

Transom-fixing on the pull side only.

Optional activators, radio receivers, electric strikes

Manual pushbutton,
System 55

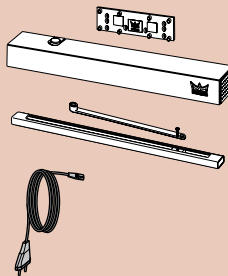

Radio transmitter
DORMA atent

Radio receiver BRC-R
